SUMMER SHOWS FOR YEAR 9s AND 10s

Guildford Yvonne Arnaud Theatre

Wed 5 July 2017,
10.am–noon & 1pm–3pm

Tickets: £9 (inc VAT) – teachers are **FREE**.

The Yvonne Arnaud Theatre, postcode GU1 3UX, is a seven minute walk from Guildford mainline train and bus stations.

Inspire your Year 9s and 10s – even the ones who don't love maths – with a lecture show featuring some of the country's most entertaining maths speakers.

Do your students wonder what's the point of algebra? Who on earth needs Pythagoras? And who cares about exponentials?

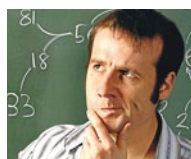

In this highly engaging and interactive show Matt Parker, Ben Sparks and Rob Eastaway (plus special guest, Jen Rogers) explain why there is actually a point to the maths your students have been studying this year. This is a maths show like your students have never seen before, with games, puzzles, surprises and a few laughs thrown in.

These shows are a joint venture between Maths Inspiration and The Further Maths Support Programme.

Matt Parker is known as the 'stand-up mathematician' and is the only person to hold the prestigious title of London Mathematical Society Popular Lecturer while simultaneously having a sold-out comedy show at the Edinburgh Festival Fringe. A regular on *Numberphile*, Matt is always keen to mix his two passions of mathematics and stand-up as well as presenting TV and radio shows.

Ben Sparks is a mathematician and busker who travels the country demonstrating the beauty of maths and occasionally singing about it. He's based at University of Bath and gets surprisingly passionate about imaginary numbers (look them up . . .).

Rob Eastaway is an author whose books on everyday maths include the bestselling *Why Do Buses Come In Threes?* and *The Hidden Maths of Sport*. He appears regularly on BBC Radio 4 and 5 Live to talk about the maths of everyday life and has given maths talks around the world to audiences of all ages.

We'll also have as a special guest **Jen Rogers**, research fellow at the Department of Statistics at the University of Oxford. You may have seen her on TV or heard her on radio talking about statistics in everyday life. Jen will talk about how she uses statistics to decide if new medical treatments will actually work.

All prices include VAT (our VAT number is 547 9272 06). You can find out more details on our website www.mathsinspiration.com
